

# 9th grade science project

@The challenge of creating a simple tool to help you accomplish your task at home or school.

Eg; Removal of spider nets

Removing moisture

Remove the lid from the red bowl

To do

Safely break a tree's fruit

@ It is not expected to reproduce a device currently in use for this purpose.

@ At least there is an improvement in the device currently being used.

@ If your device comes up as a new idea, it should be highly appreciated.

@ Step by step how to create yours. Also include photos.

@ Use as much waste as possible around.

@ Create a tool guide for using the device.

If a video can be used to demonstrate its use, it should be greatly appreciated.
